A single source that provides The Perfect Fit for ALL your compressed air needs

During our 60 years of serving the Compressed Air Industry we have developed a real understanding of our clients' needs. As a result we have created a Complete Compressor Parts Service that we believe not only provides parts that are the perfect fit for your machines but more importantly, a service that provides the perfect fit for your business.

Our principle **ATLAS COPCO** franchise gives our customers access to parts and technical support for one of the most popular brands in the industry.

Through the Atlas Copco range of **UNI Spare Parts™**, we are able to offer alternative **Filter Elements and Lubricants** for a huge range of equipment at extremely competitive pricing and, more importantly, with first class availability.

Our service is further complemented by our own constantly expanding **SEARCH SEAL** range of high quality alternative parts. As well as our stock being extensive and highly competitive, all parts can be instantly de-branded. This allows you to protect your supplier source, and to add your own branding label to the parts that we supply.

Don't worry if your requirements stretch beyond our alternative ranges, as our well-established supply chain network allows us to stock and supply most **genuine compressor parts at discounted prices**.
